

Pre-Algebra
Trimester 3 Study Guide

Name _____

Period _____

1. What is the measure of $\angle WUT$? 70°

LINEAR
PAIR
 $180 - 110$

CORRESPONDING
ANGLES

2. If the measure of $\angle XYV$ is 70° what is the measure of $\angle WXT$? 70°

3. Find the measure of the supplement

of 40° 140°

$180 - 40 = 140$

5. Classify the triangle by its angles and sides.

SCALENE

RIGHT

4. Find the sum of the interior angles for a pentagon

Find the area of each figure

27×16
 $\boxed{432} \text{ cm}^2$

$A = \frac{8 \cdot 8}{2}$
 $A = \frac{64}{2}$
 $A = 32 \text{ in}^2$

$A = \frac{(b_1 + b_2)h}{2}$
 $A = \frac{(4 + 10)7}{2}$
 $A = \frac{(14)(7)}{2}$
 $A = 49 \text{ cm}^2$

9. Find the length of the missing side

$a^2 + b^2 = c^2$

$5^2 + 12^2 = c^2$
 $25 + 144 = c^2$
 $169 = c^2$
 $c = \sqrt{169}$
 $c = 13$

10. Find the circumference of the circle

$$C = \pi d$$

$$C = 3.14(21)$$

$$65.94 \text{ cm}^2$$

11. Find the area of the circle

$$A = \pi r^2$$

$$A = 3.14(8)^2$$

$$A = 3.14(64)$$

$$A = 200.96 \text{ m}^2$$

12. Roll a 1-6 number cube. Without looking, choose a card with the letter A, B, or C.

number of outcomes: $6 \times 3 = 18$

13. A lunch menu lets you choose 1 sandwich, 1 drink, and 1 fruit. There are 4 types of sandwiches, 3 types of drinks, and 2 types of fruit. How many different lunch combinations are possible?

$$4 \times 3 \times 2 = 24$$

14. A coach is choosing 4 runners to run a relay race. Each runner will run a different part of the race (first leg, second leg, etc.). If 6 runners are available, how many different orders can the 4 runners be arranged in the race?

$${}_6P_4 = 6 \times 5 \times 4 \times 3 = 360$$

15. A student wants to read 3 books over the summer from a list of 7 books. If the order doesn't matter, how many different groups of 3 books can the student choose?

$${}_7C_3 = \frac{7 \times 6 \times 5}{3 \times 2 \times 1} = \frac{210}{6} = 35$$

16. The 26 letters of the alphabet are placed into a bag. One letter is drawn randomly and not replaced in the bag. Then a second letter is drawn. What is the probability that a vowel is drawn both times?

$$\frac{5}{26} \times \frac{4}{25} = \frac{20}{650} = \frac{2}{65}$$

17. If one die (Game Cube) is rolled, what are the "odds against" rolling a 5?

$$P(5) = \frac{1}{6}$$

$$P(\text{NOT } 5) = \frac{5}{6}$$

$$5:1$$

Complete the function table.

18. $y = 4x + 2$

x	-1	-4	5	8
y	-2	-14	22	42

Classify the slope of the line as positive, negative, zero, or undefined.

19,

ZERO

20. Find the slope of the line between the two points.

$(6, -2), (15, -2)$

$$\frac{-2 - (-2)}{15 - 6} = \frac{0}{9} = 0$$
